

# Stainless Steel Armour Ring™

## Product Details

### Stainless Steel Armour Ring™

A simple conical collar which renders a standard hexagon nut or bolt tamper resistant.

The Armour Ring™ can be applied to any British or DIN standard hexagon nuts or bolts using a standard hammer or Armour Ring™ installation tool. It leaves a smooth clean finish which is often favoured by Health & Safety executives and isn't governed by a torque level like some one-way fasteners.

- Has been Home Office approved
- Also stocked in Steel Zinc Plated (CR-3)

STØRRELSE	MATERIALE	VARENDR.	ANTAL/BOX
