

Zinc Plated Armour Ring™

Product Details

Zinc Plated Steel (CR-3) Armour Ring™

A simple conical collar which renders a standard hexagon nut or bolt tamper resistant.

The Armour Ring™ can be applied to any British or DIN standard hexagon nuts or bolts using a standard hammer or Armour Ring™ installation tool. It leaves a smooth clean finish which is often favoured by Health & Safety executives and isn't governed by a torque level like some one-way fasteners.

- Has been Home Office approved
- Also stocked in 303 S31 Stainless Steel

| STØRRELSE | MATERIALE | FINISH | VARENDR. | ANTAL/BOX |
